Hi BA'ers,

I've gotten a pretty good list of good BA type of hamfests that covers the right hand coast and the midwest, but very little input on good hamfests on the left hand coast. Are there any good BA hamfests west of Texas??? I will publish the list for your comments when I get a good complete list.

John, I agree with you almost completely. I am not interested in stuffed animals, garage sales and such at a hamfest and would agree to their being not allowed. However, computers have actually become an integral part of my

station, allowing much better satellite tracking and QSL card exchanging information. Having them separate but still at the hamfest is not a bad idea at all. Has Timonium, MD become any better in the last few years?

Puyallup, Washington in the spring is good. Very intense, two floors of mostly BA and military radio stuff. Well organized, motivated sellers. There is a lot of Tektronix equipment there. I now am the proud owner of a Tek 7704A and a very nice Hallicrafters R-45/ARR-7 receiver + ps. Go visit Glen Giatti (sp?) at Electronic Dimensions in Tacoma, too.

Having Tektronix, Boeing and the ocean nearby fuels the surplus electronics business there. Both Boeing and Tektronix have surplus outlets in the area. And a visit with Glen Giatti (sp?) at Electronic Dimensions in Tacoma is worthwhile even if you just do window shopping. An amazing collection in the back rooms.

Any have or have seen one of these "transfer oscillators." Seems to be a hetrodyning thing to xlate a HF sig-gen into the 1 ghz range w. a diode mixer and a cavity-triode oscillator.

Interesting thing now on garage floor w. rest of KV4N stuff reported on request last Friday

And BTW, some list sales/deletions, additions, & re-pricings for the interested.

I used to have one of these. Boy, it has been a long time ago. It was a very stable, but, variable, VHF oscillator as I recall, that indeed was used to extend the range of frequency counters and such of the era. It also had an external modulation input, and, believe it or not, I used it, by itself, on 2 meter simplex fairly often when I still lived in Fort Wayne, IN. I would say that this was back in the late 60's. Brings back some neat memories. If I remember right it even had a small CRT built into it to allow one to obtain a good "zero beat". 73 - Mike

Content-description: Mail message body

Greetings all;

The response has been most gratifying, the solid consensus being to bring this fine old set back to operation. There has also been a wealth of tech info, incl the old mod articles from CQ and other sources, the CQ Dec-'57 Geisler/Japan Electronic Trading mod was particularly insightful. Has anyone had experience with '200s thus reworked ala Geisler?

My set, a BC-1004-C gen coverage, being near mint, will get a standard recap/resistor resto, and as it came without PS, I will have to either find a RA-74/84/94, or eventually construct a suitable PS. My greatest dread is the audio xformers may prove defective. Almost anything else should be surmountable (I hope!).
Any further guidance/advice/info appreciated.

Thank You All!! Best 73s; Steve Bringhurst

Does anyone have a schematic for a Kenwood 820 transeiver?
What I really need is the pinout for the octal connector on the back of the transeiver to determine where the relay contacts are to key a linear amp.

George,

Here it is the Butler Hamfests in Butler, PA north of Pittsburg, first Sunday in June and first Sunday in September [two different sponsors, Breezeshooters and I think the Butler Radio Club]. 73.

Anyone know the name and location of the boatanchor hamfest the week after Shelby, NC that's in North Georgia? Haven't been but hear its a boatanchor hamfest.

Saved an earlier post but have lost it.

Thanks, Larry

I have some items that I am interested in selling and have no idea what =
to ask. These are surplus to my needs and would like to see if there is =
any interest. The first is a 310-B1 in nice condition. The second is a =
70E 8A VFO that is basically unchecked. The 310-B1 works. The VFO came =
from a piece of homebrew gear that I'm not sure was working or not. It =
was large, heavy and had some nice iron on it, so I parted it out and =
this was one of the parts. There is a break on the corner of the front =
glass (see picture). The trim bars are included. One is mounted on the =
VFO and the other is at the bottom of the picture and mounts directly on =
the front cover.=20

I have included the address of some jpegs of these items:

www.hal-pc.org/~tsmith/70E_8A_f.jpg
www.hal-pc.org/~tsmith/70E_8A_r.jpg
www.hal-pc.org/~tsmith/310-B1_front.jpg
www.hal-pc.org/~tsmith/310-B1_front.jpg
www.hal-pc.org/~tsmith/310-B1_front.jpg
www.hal-pc.org/~tsmith/12Z_knob.jpg

The last jpeg is a aluminum knob from a Collins 12Z remote mixer. I'm =
looking for as many as three of these for a restoration project.

If you have any of these knobs or have any interest in the other gear, =
please drop me a email.

Thanks,
Tom N5AMA

Subject: BC-1147A schematic sought
Content-Type: text/plain; charset="us-ascii" ; format="flowed"

Hello.

Can anyone point me toward where to get a schematic for a BC-1147A
receiver? I've tried several places so far (including BAMA and
KG7BZ's excellent Military Boatanchor Manuals page; even the E-place)
with no luck.

My understanding is that it was part of SCR-291A (TM 11-243) and SCR-502 (TM 11-256) but I've not been able to find a source for either of these TMs.

Any help greatly appreciated.

73,
Joe K9LY

"How To Buy and Convert Surplus Electronic Equipment" by Mark Starin
Published by TAB in 1982. Nice condx, with dust jacket, except call of PO
written in ink on inside fly.

480 pages, 10 chapters, covering:

RF Comm. Co-Pilot, AN/TRC-77, AN/GRC-9 receiver, AN/PRC-6, AN/FRR-36,
RT-70/GRC, RT-66/67/68, Motorola Handie-Talkie.

Would \$25.00 (incl. shipping) be too much?

Because of work travel I've been able to attend some 'Hamfests'-swapmeets on the East coast. The Timonium MD get together in late March has turned up some neat "stuff" (RBA, RBB, parts a bunch) as did the the 'Fest at Berryville VA a few weeks ago. Southern CA has a Ham-electronic swap each weekend through the month starting with the first Saturday in Santee/San Diego through the last Saturday at TRW just west of LA. TRW was where an AF67 with factory power supply followed me home for \$10 along with an LM-13.

The same weekend mentioned below as the Fall-Fest there is a Mil radio get together in PA.

A good example of the biggest, but no longer the best is the two-day hamfest in early spring at Timmonium, MD.

I've only been twice, year before last and this year, but did find some neat BA stuff. Geeze was it cold!

Berryville, VA, Hamfest = an example of one of the best, but not the biggest. The seller to buyer ratio is very good.

Yep that was a good one!!! I drove out from Alexandria at 0430 to get there by 0600 and it was well worth it. I got to yak with BA friends in front of your truck even though you were not open yet. Just got home from Tokyo but will be in the VA-DC-MD area from Sept 6-13 so will hit the Fall-Fest and try for a shot at the Mil Radio meet in PA.

Has Timonium, MD become any better in the last few years?
73 George

I look for parts rather than big chunks and Timonium has been good the two times I was there. I did buy an RBA-RBB pair with power supplies and some RME so BASauris do show up. The other neat part is running into BA folk like Paul Bernhardt, Roy Morgan, Mike Hanz etc. Even if I don't cause myself a shipping nightmare its always great to meet other BA folk.

I know the sender's intentions were solely good, but i consider it a bunch of horseshit to have to "register" to read a short article. Yes- they want my name, address, age, email address. "My benefit" is that it "will improve service to me". I am not interested enuff in this topic at the moment, personally, to pursue it, but i am quite sure some elementary searches would provide an easy alternative source, who doesn't have the need to precisely "register" casual drop-in visitors.
Contrarily yours, Hue Miller

Anchorites,

Well here I am back from some time off with a huge backlog at work, but an interesting new boatanchor. It;s an Eddystone panadaptor type EP17R. These are quite uncommon down here. It accepts a 5.2 MHz IF and can therefore be used with the 770R VHF receiver I use for entertainment FM reception in the shack.

Does anyone have data or a manual copy??? This is a nicely built unit which works nicely especially after replacement of some out-of-spec passive components. I have been able to figure out how it works pretty well by inspection, but real data would be nice.

Subject: Where can I find current amateur frequency allocations?

Folks,

Sorry for the slightly off-topic message, but the FCC website has defeated me. Can anyone point me to the right URL, FCC, ARRL, or whoever?

Regards,

Scott Robinson

HRO should have ICOM or Yaesu color charts

Hank

KN6DI

No need to put a radius on the edges as they are on flat paper.

Folks,

What a bunch! I asked this question , and Presto! Multiple answers. One BA-er even sent me the file, already downloaded from the ARRL site.

Only one question remains. I read somewhere that a small band around 5 MHz was to be added for amateur use, and the ARRL table makes no mention of it. Is this new allocation bogus or just not yet a done deal?

Thanks!
